Business and ICT innovations

Some men see things as they are and say, "Why?" I dream of things that never were and say, "Why not?"

George Bernard Shaw

Surviving in the

new e-world

Can you win Formula One with outdated racing cars? Can you satisfy customers with outdated products and services? Can you maximise profits with outdated business models? Can you stay static when the front runners of the corporate world go Mobile, Global and Virtual?

The business, today, is undergoing a metamorphosis, from static to dynamic.

New advances in communications and travel have driven the world economy, developing new markets and enhancing traditional ones with low cost supply routes.

Outsourcing non-core activities has reduced overhead structures and helped to meet local aspirations. It has forced firms to share knowledge with others -reliability, quality, delivery and most importantly, customer satisfaction, becoming integrated responsibilities.

Alongside these developments has been the emergence of digital technology and the internet, changing all our lives. Instant Messaging has appreciably increased productivity and reduced communication errors in Enterprises world over.

And the next phase in the path of progress will be 'Virtual Networks and Working Communities'.
Does your

organisation

accommodate change
without compromise?

Change happens. While you can't control much of the world changing around you, you can control how you respond. You can choose to anticipate and embrace changes. Going mobile and getting hooked to the broadband doesn't make your organization's 'Change & Knowledge Strategy' complete and effective!

At QXSystems™, we believe static business solutions can not accommodate the changing face of technology. Strategic advantage can only be gained through seamless integration and customized solutions, using the latest knowledge tools.

"What is the edge my **business model** lacks?"

Today, the work is becoming Mobile, Global and Virtual - all at the same time! But, unfortunately, your resources may have stayed fixed, people stationary and most of all your corporate philosophies and thinking stayed conventional.

The result your organization may have systems

- that are location centric,
- consisting of several unconnected applications,
- do not have any definite decision process,
- do not capture and document data and convert them into knowledge, and
- rely only on people as storage of data.

Guaranteeing you an edge over competition

Organizations, need to have a philosophy, IT systems and ICT practices aligned to take complete advantage of global opportunities. You need to be integrated on to a robust and virtual system, challenging many of today's concepts against a background of accelerating change.

You need:

- An innovative management system designed for the mobile, global and virtual organizations of the future

- A working community platform where each member of your corporate team can be independent and yet connected well in a collaborative decision-making

- A knowledge management strategy base and tools working in concert to take advantage of organization's knowledge capital

- A platform for continuously building and conducting Virtual Communities of Practice on a global scale

- An environment that makes each team member share the risk of not maintaining performance and reputation - thereby infusing greater trust, commitment and unity

- A process which enables everyone to focus on customer satisfaction and sustain long- term market share and growth

QXS ™

$$Q*X*S = Success^{™}$$

"How do we **get there** from here - which 'change' strategy will be effective?"

You can achieve this with a new philosophy, a new system and a new partner!

The new philosophy:

QXS™ Philosophy

The QXS™-formula says that the level of success that any person or organization can achieve at any specific moment is set by the level of his Q, X and S multiplied by each other.

Q : Level of Quality

X : Level of eXcellence; that is, Attitudes, Values, Motivations, Dreams, Perceptions, Culture, etc.
S : Level of Systems that you have, build and follow.

In case any of the parts is zero the end-result (level of success) will be zero as well. No single element of the formula can be forgotten, ignored or over-extended. Together the levels of Q, X and S make up a comprehensive NEW unit QXS™. Each element affects each other, therefore constantly driving our level of QXS™ (Success) higher or lower.

A new system : WorkACE™

Developed based on the powerful QXS™ philosophy, WorkACE™ is a system that enables you to gain unlimited access to business information on demand. It doesn't matter where you are, what access device you're using, what networks you connect through, or what kind of business information you need. With this unique integrated virtual platform, you can securely, easily and instantly access the information you need anywhere, anytime. It can also save millions in IT costs, achieve new levels of business agility and maximize the productivity of your employees.

Welcome to WorkACE™. It is a smart web-application based on a comprehensive collaborative Virtual and Mobile Working Community platform with built-in tools like Intranet, Groupware, KM, CRM, PM, SCM, WebMail, WFM, e-Support, etc. integrated into one Online Working Facility.

A new partner: QXSystems™, the innovative Business and ICT solution company.

We help hundreds of companies do business like never before.

Call us for a free concept demonstration and an entry to the new e-world of Virtual possibilities.

Who we are ?

QXSystems™ is a Global Business- and ICT consulting company, founded in 1998.

The company was founded by Mr.Johan M Karlstedt, a visionary, who invented the QXS™ philosophy, which is radically changing the perception of many business leaders about running the future e-Businesses. QXSystems™ today employs the best brains across the globe in a pursuit to become a trend setter and a leader in the new era business systems.

QXSystems™ is truly a virtual organization having its employees spread across three continents. These employees are constantly connected and work in complete collaboration using the virtual ICT platform

WorkACE™, the flag ship product of the company.

QXSystems™ practices the QXS™ philosophy, which improves the success factor of the company on a continuous basis.

Main Products and Services of the company at present are:

- QXS-Coaching™ ~ through global franchising network owned by the company.
- WorkACE™ ~ the virtual collaborative ICT platform which is developed on ASP and runs on a network owned by the company.
- FranACE™ ~ another collaborative platform and ICT system for managing Franchise operations across the globe.
